NUMBER 1/2

RADIATIVE PROPERTIES OF HOT DENSE MATTER

vii Preface

J. Abdallah Jr., R. E. H. Clark, J. M. Peek, and **C. J. Fontes** — 1 Kinetics calculations for near Ne-like ions

J. R. Albritton and **D. A. Liberman** — 9 On the distribution of bound levels of ions in dense plasmas: the plasma polarization shift

C. A. Back, L. Da Silva, H. Kornblum, D. Montgomery, B. MacGowan, G. Glendinning, J. Fenske, E. Hsieh, and **R. W. Lee** — 19 X-ray flux from a burnthrough Au foil

A. Bar-Shalom, J. Oreg, and **W. H. Goldstein** — 27 Configuration interaction in LTE spectra of heavy elements

J. Bauche, C. Bauche-Arnoult, and **J.-F. Wyart** — 41 Intensity distribution in atomic transition arrays

T. Blenski and **B. Cichocki** — 49 Polarizability of partially ionized, dense plasmas (application to photo-absorption calculations)

A. Calisti, L. Godbert, R. Stamm, and **B. Talin** — 59 Fast numerical methods for line shape studies in hot and dense plasmas

L. A. Collins, J. D. Kress, D. L. Lynch, and **N. Troullier** — 65 Molecular dynamics simulations of dense plasmas

K. Eidmann, W. Schwanda, I. B. Földes, R. Sigel, and **G. D. Tsakiris** — 77 Experimental investigation of radiative transport in x-ray heated low-Z matter

R. C. Elton, J. Grun, D.-M. Billings, F. C. Young, B. H. Ripin, H. R. Burris, J. Resnick, and **D. J. Ripin** — 89 Soft x-ray output from a laser-produced plasma

David Erskine, Balazs Rozsnyai, and **Marvin Ross** — 97 Measuring opacity of shock generated argon plasmas

E. Förster, E. E. Fill, K. Gäbel, H. He, Th. Missalla, O. Renner, I. Uschmann, and **J. Wark** — 101 X-ray emission spectroscopy

B. A. Hammel, C. J. Keane, T. R. Dittrich, D. R. Kania, J. D. Kilkenny, R. W. Lee, and **W. K. Levedahl** — 113 K- and L-shell x-ray spectroscopic measurements of fuel and pusher dopants in indirectly driven ICF implosions

C. A. Iglesias, J. K. Nash, M. H. Chen, and **F. J. Rogers**	125	Estimating plasma temperatures from transmission spectra
Ya. Ispolatov and **E. Oks**	129	A convergent theory of Stark broadening of hydrogen lines in dense plasmas
V. L. Jacobs	139	Radiation-hydrodynamics approaches to laser–matter interactions
C. J. Keane, B. A. Hammel, A. L. Osterheld, R. W. Lee, D. R. Kania, L. J. Suter, R. C. Mancini, C. F. Hooper Jr., and **N. D. Delamater**	147	Analysis of *K*- and *L*-shell spectra from indirectly driven implosions
David P. Kilcrease	161	Plasma electric microfields for differing electron and ion temperatures
A. Klisnick, A. Carillon, P. Dhez, B. Gauthé, P. Goedtkindt, H. Guennou, P. Jaeglé, G. Jamelot, C. Möller, J. P. Raucourt, B. Rus, A. Sureau, P. Zeitoun, N. Grandjouan, and **J. Virmont**	169	Increasing the gain-length product of x-ray lasers
Jon T. Larsen and **Stephen M. Lane**	179	HYADES—a plasma hydrodynamics code for dense plasma studies
E. Leboucher-Dalimier, A. Poquérusse, P. Angelo, I. Gharbi, and **H. Derfoul**	187	Experimental exhibition of strongly correlated plasma effects. Asymmetrical line wings and possible transient molecule features
D. Liberman and **J. Albritton**	197	Dense plasma equation of state model
R. C. Mancini, C. F. Hooper Jr., and **R. L. Coldwell**	201	Modeling of absorption spectra in dense argon plasmas
Kuniaki Masai	211	Density dependence of line intensities and application to plasma diagnostics
Gérard Massacrier	221	Self-consistent schemes for the calculation of ionic structures and populations in dense plasmas
E. Minguez, S. Eliezer, and **R. Falquina**	229	Equations of state for electrons in non-LTE plasmas
Richard M. More	237	Relativistic semiclassical atomic transition rates
W. L. Morgan, J. T. Larsen, and **W. H. Goldstein**	247	The use of artificial neural networks in plasma spectroscopy
Gordon L. Olson, Jack C. Comly, J. Kenneth La Gattuta, and **David P. Kilcrease**	255	Stark broadened profiles with self-consistent radiation transfer and atomic kinetics in plasmas produced by high intensity lasers

A. L. Osterheld, R. S. Walling, B. K. F. Young, W. H. Goldstein, G. Shimkaveg, B. J. MacGowan, L. Da Silva, R. London, D. Matthews, and **R. E. Stewart**	263	Ionization balance and gain calculations for neon-like selenium x-ray laser plasmas
T. S. Perry, R. A. Ward, D. R. Bach, R. J. Doyas, B. A. Hammel, D. W. Phillion, H. N. Kornblum, J. M. Foster, P. A. Rosen, R. J. Wallace, and **J. D. Kilkenny**	273	Experimental techniques to measure thermal radiation heat transfer
O. Peyrusse	281	X-ray spectroscopy studies using the TRANSPEC code
S. A. Pikuz, B. A. Bryunetkin, G. V. Ivanenkov, A. R. Mingaleev, V. M. Romanova, I. Yu. Skobelev, A. Ya. Faenov, S. Ya. Khakhalin, and **T. A. Shelkovenko**	291	Radiative properties of hot dense *X*-pinch
G. D. Pollak, N. D. Delamater, J. K. Nash, and **B. A. Hammel**	303	Development of a non-LTE spectral post-processor for dense plasma simulations with application to spectroscopic diagnostics in spherical implosions at Nova
S. J. Rose	317	A review of Opacity Workshops
F. B. Rosmej	319	Diagnostic properties of Be-like and Li-like satellites in dense transient plasmas under the action of highly energetic electrons
A. Sasaki, K. Suzuki, H. Yoneda, K. Ueda, and **H. Takuma**	335	Atomic processes in short wavelength laser-produced plasmas for x-ray laser applications
A. Schulz, M. Hebach, H.-J. Kunze, F. R. Rosmej, and **F. Walden**	341	Investigations of micropinches with comparison to the predictions of the radiative collapse model
J. F. Seely, U. Feldman, C. M. Brown, B. A. Hammel, C. A. Back, E. Hsieh, and **R. W. Lee**	349	Absorption spectroscopy of radiatively-heated low-*Z* foils
R. Shepherd, D. Price, W. White, S. Gordan, Al. Osterheld, R. Walling, W. Goldstein, and **R. Stewart**	357	Characterization of short pulse laser-produced plasmas
C. C. Smith, D. J. Hoarty, and **J. M. Foster**	361	Experimental investigation of non LTE population redistribution in radiatively pumped plasmas
P. T. Springer, D. F. Fields, B. G. Wilson, J. K. Nash, W. H. Goldstein, C. A. Iglesias, F. J. Rogers, J. K. Swenson, M. H. Chen, A. Bar-Shalom, and **R. E. Stewart**	371	Spectroscopic measurements of Rosseland mean opacity

Hideaki Takabe and **Takeshi Nishikawa** 379 Computational model for non-LTE atomic process in laser produced plasmas

J. S. Wark, H. He, O. Renner, M. Kopecký, E. Förster, and **T. Mißalla** 397 Measurements of motional Doppler shifts in x-rays emitted by laser-produced plasmas

W. E. White, F. G. Patterson, D. F. Price, and **R. Shepherd** 407 Ultrashort pulse laser for high density plasma experiments

Sun Yongsheng, Meng Xujun, and **Li Shichang** 411 Electron conductive opacities for partial ionization gases

B. K. F. Young, A. L. Osterheld, G. M. Shimkaveg, R. L. Shepherd, R. S. Walling, W. H. Goldstein, and **R. E. Stewart** 417 Time resolved measurement of electron temperatures of exploding foil x-ray laser plasmas

Yuqing Zhou, Baohan Zhang, Guohong Yang, and **Anle Lei** 425 Study of x-ray spectra of highly stripped ions from laser-induced plasmas

R. Cauble, D. W. Phillion, R. W. Lee, and **T. J. Hoover** 433 X-ray driven flyer foil experiments near 1.0 Gbar

NUMBER 3

V. Malathy Devi, D. Chris Benner, M. A. H. Smith, and **C. P. Rinsland** 439 Temperature dependence of Lorentz air-broadening and pressure-shift coefficients of $^{12}CH_4$ lines in the 2.3-μm spectral region

Bingjing Su and **G. C. Pomraning** 467 A variational approach to stochastic transport

B. Canaud, J. R. Burgan, and **J. P. Rozet** 485 Focusing light from a scattering medium using a variational principle

M. I. Mishchenko, A. A. Lacis, and **L. D. Travis** 491 Errors induced by the neglect of polarization in radiance calculations for Rayleigh-scattering atmospheres

P. H. Paul 511 A model for temperature-dependent collisional quenching of OH $A\,^2\Sigma^+$

O. Atanacković-Vukmanović and **E. Simonneau** 525 The use of iteration factors in the solution of the NLTE line transfer problem—I. Two-level atom

NUMBER 4

M. E. Wickliffe, S. Salih, and **J. E. Lawler** 545 Atomic transition probabilities in RuI

K. R. Karim and **C. P. Bhalla** 557 Theoretical Auger spectra of selected doubly excited Li-like ions

K. Dzierzega, S. Labuz, and **K. Musiol** 567 Branching ratio measurements for singly ionized argon

J.-P. Bouanich, G. Blanquet, and **J. Walrand**	573	Diode-laser measurements of self-broadening coefficients and line strengths in the ν_3 band of $CH_3{}^{35}Cl$
P. K. Cheo	579	Electrooptic waveguide modulators for frequency tuning of infrared lasers
Zhiping Chu, Li Chen, and **Peter K. Cheo**	591	Absorption spectra of NH_3 using a microwave-sideband CO_2-laser spectrometer
V. B. Kisselev, L. Roberti, and **G. Perona**	603	An application of the finite element method to the solution of the radiative transfer equation
J. Boissoles, R. H. Tipping, and **C. Boulet**	615	Theoretical study of the collision-induced fundamental absorption spectra of N_2–N_2 pairs for temperatures between 77 and 297 K
Sunggi Chung, Chun C. Lin, and **Edward T. P. Lee**	629	Rate coefficients for ionization and three-body electron–ion recombination of oxygen atoms in the ground and excited states
Robert J. Hall	635	Radiative dissipation in planar gas–soot mixtures
Malcolm T. M. Lightbody and **Geoff J. Pert**	645	The role of the line profile in radiative transfer in expanding plasmas
Notes		
P. C. Stancil	655	Partition functions and dissociation equilibrium constants for H_2^+ and He_2^+
J. M. Midha and **S. C. Gupta**	659	Radiation losses from impurities in a Tokamak
Corrigendum	663	

NUMBER 5

F. A. Gutierrez, H. Jouin, and **E. Cormier**	665	A comparative study of the ion-sphere and Debye–Huckel potentials
Gh. Blanquet, P. Coupe, J. Walrand, and **J.-P. Bouanich**	671	Determination of broadening coefficients and intensities for overlapping spectral lines with application to the ${}^{Q}R(3,K)$ lines in the ν_3 band of $CH_3{}^{35}Cl$
P. Varanasi and **V. Nemtchinov**	679	Thermal infrared absorption coefficients of CFC-12 at atmospheric conditions
O. Zuchuat, R. Sanchez, I. Zmijarevic, and **F. Malvagi**	689	Transport in renewal statistical media: benchmarking and comparison with models
J. P. Knauer and **M. Kock**	723	Self-consistent set of Ar I transition probabilities obtained by means of a radiative transfer model
D. G. Hummer and **A. A. Kutepov**	729	Algorithms for rapid evaluation of band transfer functions for linear molecules
J. Jimenez-Mier	741	Contribution of the instrument window function to the profile of autoionizing resonances

Q. Ma and **R. H. Tipping** 751 The detailed balance requirement and general empirical formalisms for continuum absorption

Michael I. Mishchenko and **Larry D. Travis** 759 Light scattering by polydisperse, rotationally symmetric nonspherical particles: linear polarization

R. Sperger, B. Schelm, M. Kock, T. Neger, and **M. Ulbel** 779 Absolute oscillator strengths of CrII-lines from combined phase shift and emission measurements

Corrigendum 787

NUMBER 6

W. M. F. Wauben, J. F. de Haan, and **J. W. Hovenier** 789 Relationship between the polarized radiation fields in externally and internally illuminated homogeneous planetary atmospheres

R. Sanchez, O. Zuchuat, F. Malvagi, and **I. Zmijarevic** 801 Symmetry and translations in multimaterial line statistics

Juri Poutanen 813 Compton scattering matrix for relativistic Maxwellian electron distribution

B. Rutily and **J. Bergeat** 823 The solution of the Schwarzschild–Milne integral equation in an homogeneous isotropically scattering plane-parallel medium

Spiros Alexiou 849 Calculation of the semiclassical Stark-broadening dipole width functions for isolated ion lines

Ulyana I. Safronova and **Joseph Nilsen** 853 Autoionization states of lithium-like ions with large principal quantum number

Peter H. Hauschildt, Herbert Störzer, and **E. Baron** 875 Convergence properties of the accelerated Λ-iteration method for the solution of radiative transfer problems

Bingjing Su and **G. C. Pomraning** 893 Limiting correlation length solutions in stochastic radiative transfer
